SCHÜCO ALUMINIUM ENTRANCE DOORS

Welcome to the world of exclusive aluminium entrance doors, where the highest quality meets individual design. Our made-to-measure Schüco aluminium entrance doors combine premium quality, craftsmanship and individual design to create a lasting first impression. Each door line gives your home a unique character that blends harmoniously with the architecture.

Minimalist elegance and contemporary architectural style that emphasise the refinement and exclusivity of your home.

PREMIUM *line*

Traditional beauty with decorative frames and ornaments that create a warm and authentically homely style.

RETRO *line*

An elegant, bold line with striking black stainless-steel details that give your home character and a modern aesthetic.

BLACK *line*

BLACK line

Pure, minimalist design with subtle stainless-steel elements, combining contemporary aesthetics with timeless elegance.

ALUMINIUM ENTRANCE DOOR

More than just an entrance – your front door is the heart of your home. Made from selected, high-quality materials with perfect precision, it combines stability, durability and timeless elegance. State-of-the-art technology and intelligent security mechanisms ensure effortless opening, maximum protection and an unrivalled feeling of security – doors that accompany you for a lifetime and give your home lasting value, security and style.

ALUKÖNIGSTAHL
SCHÜCO

Aluminium and the environment in the field of doors, windows and facade systems: in the construction sector there is the A/U/F closed-loop raw-material system, through which industrial scrap and aluminium waste products are recycled and reused.

A photograph of a modern house at dusk. The house features a combination of horizontal wood siding and large glass windows. A large, leafy tree stands in front of the house, its branches partially obscuring the upper part of the facade. In the foreground, a garden is filled with numerous hydrangea bushes in shades of purple and white, along with some tall, feathery grasses. The overall lighting is soft and warm, suggesting the 'twilight' theme mentioned in the text.

A photograph of a modern building at night. The building has large windows, some of which are illuminated from within, showing interior spaces. In the foreground, there are two trees and some low-lying plants, which are also illuminated by warm lights. The overall scene is dark, with the building and plants providing the main sources of light.

STANDARD EQUIPMENT

5-point locking

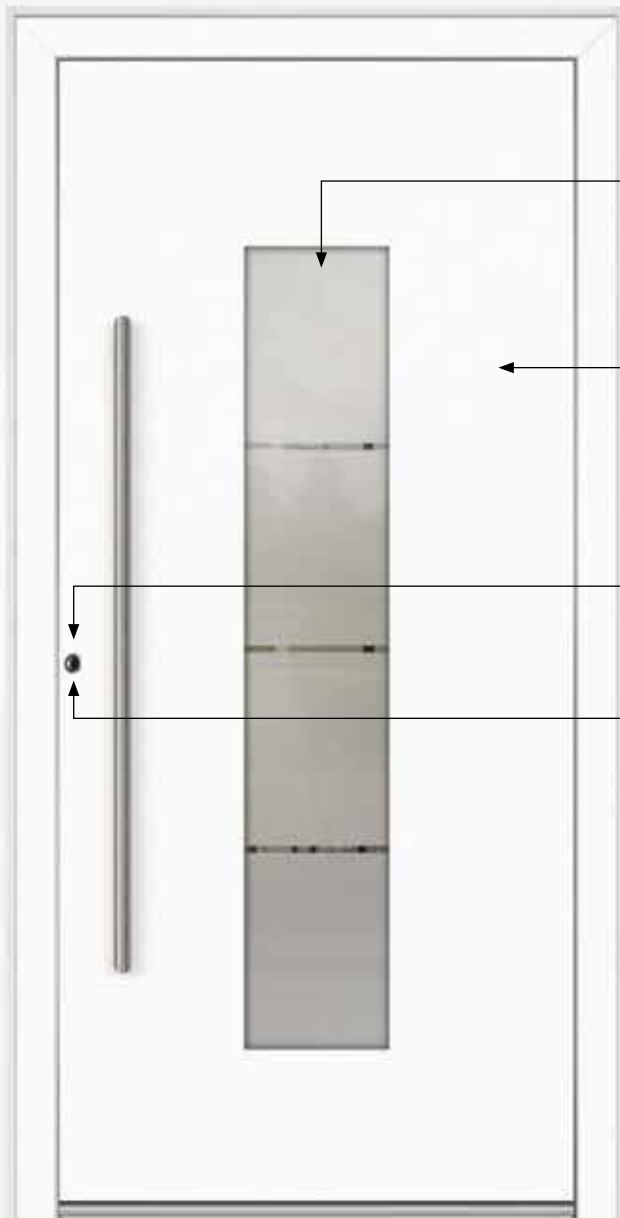

- ✓ Locking with key
- ✓ Opening the door from outside:
 - with a key
 - with the lever handle (only when the door is unlocked)
 - with the pull handle (only when the door is unlocked and in combination with a DN or DNE door opener by activating the day function)
- Opening the door from inside:
 - with a key
 - with the lever handle (only when the door is unlocked)
- ✓ **OPTIONAL**
DN – Mechanical door opener with day function

- ✓ DNE – Electric door opener with day function, incl. cable

- ✓ Door opening restrictor with EV1 turn knob

Advantages at a glance

- Overall construction depth: 90 mm, door leaf thickness: 90 mm
- Hybrid composite – patent-pending profile connection technology.
- Shear-free composite reduces the bimetal effect.
- Unique insulation and sealing properties, enhanced performance and low thermal transmittance values thanks to a new and innovative centre-seal concept.
- 3 seals in the door leaf and frame. All seals are EPDM, and prefabricated sealing corners are separate elements (not pulled in). The outer sealing level runs continuously around the perimeter (including the hinge area).
- Door leaf with full-surface panel on both sides
- Three Schüco Vision EV1 roller hinges
- Aluminium threshold with 3 seals. Thermally broken, with direct fixing to the floor

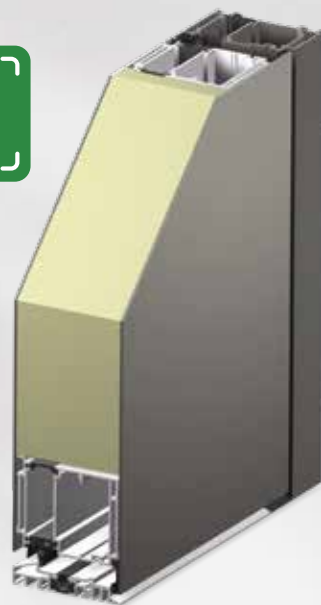

NEW-GENERATION SCHÜCO PROFILE SYSTEMS

SCHÜCO

VISION 90

- Overall construction depth: 90 mm
- Door leaf thickness: 90 mm
- 3-chamber profile construction with single insulation level
- 3 seals in the door leaf and frame
- Door leaf with full-surface panel on both sides
- Shear-free hybrid composite to compensate for the bimetal effect
- Flush design of door leaf and frame on the outside and inside
- Thermally insulated aluminium threshold EV1

ACCESS CONTROL

EASYLOCK NA4

- Unlocking via fingerprint scanner
- Unlocking with RFID card or RFID key fob (1 RFID card included)
- Optional at extra cost: additional RFID cards or RFID key fobs
- Analogue (local) operation
- User capacity: 100 fingerprints and 3,000 RFID cards or key fobs

EASYLOCK NA5

- Unlocking via the fingerprint scanner
- Unlocking via the keypad
- Unlocking via Bluetooth (near the door) using the app
- Unlocking with RFID card or RFID key fob (1 RFID card included)
- Optional at extra cost: additional RFID cards or RFID key fobs
- Optional at extra cost: remote unlocking via the app (Wi-Fi module)
- Analogue (local) operation
- User capacity: 100 fingerprints + 890 RFID cards/chips or codes

EASYLOCK NA5 NB

Suitable for surface mounting (supplied separately)

- Unlocking via the fingerprint scanner
- Unlocking via the keypad
- Unlocking via Bluetooth (near the door) using the app
- Wi-Fi, remote unlocking via app
- Unlocking with RFID card or RFID key fob (1 RFID card included)
- Optional at extra cost: additional RFID cards or RFID key fobs
- Analogue (local) operation
- User capacity: 100 fingerprints + 890 RFID cards/chips or codes

BIOREADER N7

- Unlocking via fingerprint scanner
- Remote unlocking via app
- Parallel analogue (local) or Wi-Fi control as well as GSM/ LTE connection
- Control of the LED door lighting (switch-on and switch-off time and brightness level)
- Setting access schedules or time-limited access for each user
- Setting free passage for all visitors
- Adding, changing and deleting fingerprints remotely
- Adding door opening via smartphone (access granted by e-mail)
- Access history by user for up to the last 500 events
- Receive app notifications when the door is opened
- Remote software update

BIO-TOUCHPAD N8

- Unlocking via fingerprint scanner
- Unlocking via keypad
- Remote unlocking via app
- Parallel analogue (local) or Wi-Fi control as well as GSM/ LTE connection
- Control of the LED door lighting (switch-on and switch-off time and brightness level)
- Setting access schedules or time-limited access for each user
- Setting free passage for all visitors
- Adding, changing and deleting codes and fingerprints remotely
- Adding door opening via smartphone (access granted by e-mail)
- Access history by user for up to the last 500 events
- Receive app notifications when the door is opened
- Remote software update
